ANIMAL AND PLANT HEALTH INSPECTION SERVICE

1. CERTIFICATE NUMBER: 58-R-0015  
CUSTOMER NUMBER: 930

FORM APPROVED  
OMB NO. 0579-0036

**ANNUAL REPORT OF RESEARCH FACILITY**  
(TYPE OR PRINT)

University Of South Florida  
12901 Bruce B. Downs Blvd.  
Mdc 20  
Tampa, FL 33612

NOV 09 2005

Telephone: (b)(6), (b)(7)c

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, or experimentation, or held for these purposes. Attach additional sheets if necessary)

FACILITY LOCATIONS (Sites) - See Attached Listing

**REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS Form 7023A)**

A. Animals Covered By The Animal Welfare Regulations	B. Number of animal being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals an for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for wh the use of appropriate anesthetic, analgesic, or tranquiliz drugs would have adversely affected the procedures, res or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reas such drugs were not used must be attached to this report	F. TOTAL NUMBER OF ANIMALS  (COLUMNS C + D + E)
4. Dogs			4		4
5. Cats		4	11		15
6. Guinea Pigs			2		2
7. Hamsters					
8. Rabbits			6	17	23
9. Non-human Primates				75	75
10. Sheep					
11. Pigs		1	141		142
12. Other Farm Animals					
Ferrets			8		8
13. Other Animals					

**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL  
(Chief Executive Officer or Legally Responsible Institutional Official)

Column E Explanation

NOV 09 2005

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 58-R-0015

2. Number 75 of animals used in this study.

3. Species (common name) Non-Human Primates of animals used in the study.

4. Explain the procedure producing pain and/or distress.

The natural aging process and development of diabetic-related conditions and associated pathologies can potentially produce pain, discomfort, or distress. Veterinarians are always consulted when pain, discomfort, or distress is recognized. All pathological processes associated with the aging and pre-diabetic and diabetic condition are evaluated and those that are amenable to current veterinary medical care standards are promptly placed on appropriate pharmacological therapies.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

The natural aging process and development of diabetic-related conditions and associated pathologies can potentially produce pain, discomfort, or distress. Veterinarians are always consulted when pain, discomfort, or distress is recognized. All pathological processes associated with the aging and pre-diabetic condition are evaluated and those that are amenable to current veterinary medical care standards are promptly placed on appropriate pharmacological therapies.

## Column E Explanation

NOV 09 2001

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 58-R-0015

2. Number 17 of animals used in this study.

3. Species (common name) Rabbits of animals used in the study.

4. Explain the procedure producing pain and/or distress.

Antibody production may produce local inflammation in animals administered emulsions containing Complete Freund's Adjuvant and can potentially produce pain, discomfort, or distress.

Veterinarians are always consulted when pain, discomfort, or distress is recognized and analgesics prescribed where indicated.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Antibody production can potentially produce pain, discomfort, or distress associated with the development of sterile granuloma(s) at the immunization sites. This cannot be reliably anticipated. Pain induced by these processes is treated in accordance with current veterinary medical care standards; i.e. local/systemic treatment, analgesics.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):
